

# Course Outline

---

School:	Eng. Tech. & Applied Science
Department:	Information and Communication Engineering Technology (ICET)
Course Title:	Web Application Development
Course Code:	COMP 229
Course Hours/Credits:	56
Prerequisites:	COMP 123, COMP 125
Co-requisites:	N/A
Eligible for Prior Learning, Assessment and Recognition:	Yes
Originated by:	Joanne Filotti
Creation Date:	Fall 2005
Revised by:	Patrick Gignac, Tom Tsiliopoulos, Blessing Ajiboye
Revision Date:	Summer 2023
Current Semester:	Summer 2024
Approved by:

*Students are expected to review and understand all areas of the course outline.*

*Retain this course outline for future transfer credit applications. A fee may be charged for additional copies.*

*This course outline is available in alternative formats upon request.*

## Acknowledgement of Traditional Lands

Centennial is proud to be a part of a rich history of education in this province and in this city. We acknowledge that we are on the treaty lands and territory of the Mississaugas of the Credit First Nation and pay tribute to their legacy and the legacy of all First Peoples of Canada, as we strengthen ties with the communities we serve and build the future through learning and through our graduates. Today the traditional meeting place of Toronto is still home to many Indigenous People from across Turtle Island and we are grateful to have the opportunity to work in the communities that have grown in the treaty lands of the Mississaugas. We acknowledge that we are all treaty people and accept our responsibility to honor all our relations.

## Course Description

Web Application Development is the third course in a sequence of web courses, following COMP213 and COMP125. In this course, students will learn how to design, code, and test a full-stack web application.

The major topics covered in COMP229 include both frontend and backend development, equipping students with the skills to build robust and secure web applications. Throughout the course, students will gain hands-on experience by leveraging a variety of open-source frontend and backend frameworks. By applying these frameworks, they will develop dynamic web applications alongside their corresponding APIs.

The course provides in-depth coverage of integrating web applications with a wide range of databases and data stores. Students will learn how to manipulate data and seamlessly present the results within web browsers. The course places a strong emphasis on crucial topics such as securing and deploying advanced web applications on production environments.

## Program Outcomes

Successful completion of this and other courses in the program culminates in the achievement of the Vocational Learning Outcomes (program outcomes) set by the Ministry of Colleges and Universities in the Program Standard. The VLOs express the learning a student must reliably demonstrate before graduation. To ensure a meaningful learning experience and to better understand how this course and program prepare graduates for success, students are encouraged to review the Program Standard by visiting <http://www.tcu.gov.on.ca/pepg/audiences/colleges/progstan/>. For apprenticeship-based programs, visit <http://www.collegeoftrades.ca/training-standards>.

## Course Learning Outcomes

The student will reliably demonstrate the ability to:

1. Develop a responsive front-end user interface using a library or front-end framework that effectively communicates with the back-end of the web application.
2. Implement server-side functionality using an open-source back-end framework to manage data requests and server-side computations.
3. Secure the full-stack app by implementing user authentication and authorization using common authentication mechanisms such as OAuth2, JSON Web Tokens (JWT), or session management.
4. Design and implement a data storage solution using a variety of database management systems, including both relational and non-relational, and implement CRUD operations to allow users to

interact with data and ensure data integrity and security through best practices.

5. Perform rigorous testing across different browsers, devices, and user scenarios to validate the project's compatibility, responsiveness, and user experience.
6. Deploy the web application to a production environment using cloud platforms such as AWS, Azure, or Google Cloud Platform.
7. Collaborate effectively with other team members using common software development tools such as Git, GitHub, and Agile methodologies, and participate in code reviews and testing to ensure a high-quality final project.

## Essential Employability Skills (EES)

The student will reliably demonstrate the ability to\*:

1. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.
4. Apply a systematic approach to solve problems.
5. Use a variety of thinking skills to anticipate and solve problems.
7. Analyze, evaluate, and apply relevant information from a variety of sources.
9. Interact with others in groups or teams in ways that contribute to effective working relationships and the achievement of goals.
10. Manage the use of time and other resources to complete projects.
11. Take responsibility for one's own actions, decisions, and consequences.

*\*There are 11 Essential Employability Skills outcomes as per the Ministry Program Standard. Of these 11 outcomes, the following will be assessed in this course.*

## Global Citizenship and Equity (GC&E) Outcomes

N/A

## Methods of Instruction

Interactive Lectures,  
Demonstrations  
and hands-on  
exercises,  
Class discussions

## Text and other Instructional/Learning Materials

### Online Resource(s):

posted in e-centennial on a weekly basis

## Classroom and Equipment Requirements

MS Visual Studio Code (current version)

MongoDB (current version)

Git (current version)

NodeJS (current version)

## Evaluation Scheme

- ✦ Assignment 1: Create a portfolio site with NodeJS and ExpressJS
- ✦ Assignment 2: Add Authentication to Portfolio Site, User CRUD.
- ✦ Test 1: NodeJS, ExpressJS, MVC
- ✦ Project Part 1: Team Contract - Team Forming
- ✦ Project Part 2: First Runnable Release, Basic Functionality, Proof of Concept, Pitch, Peer Review 1, Weekly Report 1
- ✦ Project Part 3: Authentication, Full CRUD, Peer Review 2, Weekly Reports 2 and 3
- ✦ Project Part 4: Final Release, Peer Review 3, Weekly Reports 4 and 5
- ✦ Project Part 5: Final Presentation
- ✦ Quiz 1: node
- ✦ Quiz 2: Express
- ✦ Quiz 3: MongoDB
- ✦ Quiz 4: React Forms, useState, Hooks

Evaluation Name	CLO(s)	EES Outcome(s)	GCE Outcome(s)	Weight/100
Assignment 1	1, 2	1, 7		10
Assignment 2	1, 2, 5	4, 5		10
Test 1	1, 2, 3, 4	1, 5		15
Project Part 1	1, 2, 4, 7	1, 4, 5, 9, 10		5
Project Part 2	1, 2, 3, 7	1, 4, 5		10
Project Part 3	1, 2, 3, 4, 7	1, 4, 5, 9, 10, 11		10
Project Part 4	1, 2, 3, 4, 5, 6, 7	1, 4, 5, 9, 10		10
Project Part 5	1, 2, 3, 4, 5, 6, 7	1, 9, 10		10
Quiz 1	2, 3, 4, 5	1, 5, 7, 11		5
Quiz 2	2, 3, 4, 5	1, 5, 7, 11		5
Quiz 3	1, 2, 3, 4, 5	1, 5, 7, 11		5
Quiz 4	1, 3, 4	1, 5, 7, 11		5
Total				100%

If students are unable to write a test they should immediately contact their professor or program Chair for advice. In exceptional and well documented circumstances (e.g. unforeseen family problems, serious illness, or death of a close family member), students may be able to write a make-up test.

All submitted work may be reviewed for authenticity and originality utilizing Turnitin®. Students who do not wish to have their work submitted to Turnitin® must, by the end of the second week of class, communicate this in writing to the instructor and make mutually agreeable alternate arrangements.

When writing tests, students must be able to produce official Centennial College photo identification or they may be refused the right to take the test or test results will be void.

Tests or assignments conducted remotely may require the use of online proctoring technology where the student's identification is verified and their activity is monitored and/or recorded, both audibly and visually through remote access to the student's computer and web camera. Students must communicate in writing to the instructor as soon as possible and prior to the test or assignment due date if they require an alternate assessment format to explore mutually agreeable alternatives.

## Student Accommodation

The Centre for Accessible Learning and Counselling Services (CALCS) (<http://centennialcollege.ca/calcs>) provides programs and services which empower students in meeting their wellness goals, accommodation and disability-related needs. Our team of professional psychotherapists, social workers, educators, and staff offer brief, solution-focused psychotherapy, accommodation planning, health and wellness education, group counselling, psycho-educational workshops, adaptive technology, and peer support. Walk in for your first intake session at one of our service locations (Ashtonbee Room L1-04, Morningside Room 190, Progress Room C1-03, The Story Arts Centre Room 285, Downsview Room 105) or contact us at [calcs@centennialcollege.ca](mailto:calcs@centennialcollege.ca), 416-289-5000 ext. 3850 to learn more about accessing CALCS services.

## Use of Dictionaries

- Any dictionary (hard copy or electronic) may be used in regular class work.

## Program or School Policies

N/A

## Course Policies

N/A

## College Policies

Students should familiarize themselves with all College Policies that cover academic matters and student conduct.

All students and employees have the right to study and work in an environment that is free from discrimination and harassment and promotes respect and equity. Centennial policies ensure all incidents

of harassment, discrimination, bullying and violence will be addressed and responded to accordingly.

### Academic Honesty

Academic honesty is integral to the learning process and a necessary ingredient of academic integrity. Forms of academic dishonesty include cheating, plagiarism, and impersonation, among others. Breaches of academic honesty may result in a failing grade on the assignment or course, suspension, or expulsion from the college. Students are bound to the College's AC100-11 Academic Honesty and Plagiarism policy.

To learn more, please visit the Libraries information page about Academic Integrity

<https://libraryguides.centennialcollege.ca/academicintegrity> and review Centennial College's Academic Honesty Module:

[https://myappform.centennialcollege.ca/centennial/articulate/Centennial\\_College\\_Academic\\_Integrity\\_Module\\_%202/story.html](https://myappform.centennialcollege.ca/centennial/articulate/Centennial_College_Academic_Integrity_Module_%202/story.html)

### Use of Lecture/Course Materials

Materials used in Centennial College courses are subject to Intellectual Property and Copyright protection, and as such cannot be used and posted for public dissemination without prior permission from the original creator or copyright holder (e.g., student/professor/the College/or third-party source). This includes class/lecture recordings, course materials, and third-party copyright-protected materials (such as images, book chapters and articles). Copyright protections are automatic once an original work is created, and applies whether or not a copyright statement appears on the material. Students and employees are bound by College policies, including AC100-22 Intellectual Property, and SL100-02 Student Code of Conduct, and any student or employee found to be using or posting course materials or recordings for public dissemination without permission and/or inappropriately is in breach of these policies and may be sanctioned.

For more information on these and other policies, please visit [www.centennialcollege.ca/about-centennial/college-overview/college-policies](http://www.centennialcollege.ca/about-centennial/college-overview/college-policies).

Students enrolled in a joint or collaborative program are subject to the partner institution's academic policies.

## PLAR Process

This course is eligible for Prior Learning Assessment and Recognition (PLAR). PLAR is a process by which course credit may be granted for past learning acquired through work or other life experiences. The PLAR process involves completing an assessment (portfolio, test, assignment, etc.) that reliably demonstrates achievement of the course learning outcomes. Contact the academic school to obtain information on the PLAR process and the required assessment.

**This course outline and its associated weekly topical(s) may not be reproduced, in whole or in part, without the prior permission of Centennial College.**

## Topical Outline (subject to change):

Week	Topics	Readings/Materials	Weekly Learning Outcome(s)	Instructional Strategies	Evaluation Name and Weight	Evaluation Date
1	Introduction to Modern Web App Development Setting Up Development Environment ES+ Review Version Control with Git and GitHub	MEAN Web Development (Amos Q. Haviv) Second Edition Online materials. <a href="https://nodejs.org/en">https://nodejs.org/en</a> <a href="https://expressjs.com/">https://expressjs.com/</a> <a href="https://git-scm.com/">https://git-scm.com/</a> <a href="https://www.mongodb.com/try/download/community">https://www.mongodb.com/try/download/community</a>	Explain the advancements in JavaScript. Explain Module pattern. Use ES6+ classes, arrow functions, new keywords for symbol declaration, and new features related to function parameters. Define JavaScript closures. Explain MEAN and MERN stack architecture. Install and run MongoDB. Install and run Node.js	Lecture Demonstration Lab Session		
2	Introduction to Node.js, Execution, Environment, Building a Simple Node.js server, Node.js Core Modules	Chapter 1 & 2 MEAN Web Development (Amos Q. Haviv) Second Edition	Evaluate Node.js runtime execution environment. Apply JavaScript closures. Discuss the concept of event-driven programming in the context of Node.js.  Explain Connect web framework and Connect middleware pattern.	Lecture Demonstration Lab Session	Assignment 1 Assigned - 10% Quiz - 5%	Week2
3	Introduction to Web Server Frameworks and Express, File Structure of Express Apps, Developing Fast Web Apps with Express	Chapter 3 MEAN Web Development (Amos Q. Haviv) Second Edition  Pages 102-126. Full-Stack React Projects Second Edition	Explore current Web Server Frameworks. Discuss MVC Pattern. Create a new Express Application. Configure the Express application. Develop an Express App for a website that includes multiple pages. Design a simple REST API.	Lecture Demonstration Lab Session	Quiz - 5%	
4	Building a REST API with Express, Express Routing, Handling GET, POST, PUT, DELETE requests,	Chapter 3,4 & 5 MEAN Web Development (Amos Q. Haviv) Second Edition	Explain REST architectural style. &nbsp; Build routes for an Express app. &nbsp; Explain NoSQL. &nbsp;	Lecture Demonstration Lab Session	Assignment 2 Assigned - 10% Quiz - 5%	Assignment 1 Due

Week	Topics	Readings/Materials	Weekly Learning Outcome(s)	Instructional Strategies	Evaluation Name and Weight	Evaluation Date
	Introduction to MongoDB, Mongoose	Pages 102-126. Full-Stack React Projects Second Edition	Install and run MongoDB. &nbsp; Examine MongoDB's document model, query &nbsp; language, and deployment architecture. &nbsp; Apply MongoDB shell commands. &nbsp; Explain Mongoose schemas and models. Explain Schema indexes, modifiers, and virtual attributes. Perform CRUD operations using the model's methods. Build a simple CRUD API.			
5	Testing REST API, Introduction to Front-End Development with a Modern library of Framework	Chapter 4 Learning React, 2nd Edition by Alex Banks, Eve Porcello  Pages 102-126. Full-Stack React Projects Second Edition  <a href="https://www.geeksforgeeks.org/reactjs-components/">https://www.geeksforgeeks.org/reactjs-components/</a>  <a href="https://legacy.reactjs.org/docs/react-component.html">https://legacy.reactjs.org/docs/react-component.html</a>	Assess and validate a CRUD API using specialized tools like POSTMAN or equivalent alternatives, ensuring the functionality and reliability of API endpoints.  Differentiate between front-end frameworks and UI libraries, understanding their unique characteristics, strengths, and use cases within web application development.  Define the fundamental concepts of React, including its component-based architecture, virtual DOM, and unidirectional data flow.  Explain and apply JSX syntax, a JavaScript extension used in React to combine HTML-like syntax with JavaScript logic for efficient component rendering.  Develop simple React components, utilizing the modular and reusable nature of React to create interactive UI elements and enhance the overall functionality of web applications	Lecture Demonstration Lab Session		
6	Constructing the Interactive UI of Web Apps	Chapter 4: Learning React, 2nd Edition by Alex Banks, Eve Porcello Publisher: O'Reilly Media, Inc.	Develop React forms, employing best practices to create efficient and user-friendly input interfaces.  Utilize React props to facilitate the seamless	Lecture Demonstration Lab Session	Assignment 2 Due Quiz-5%	Assignment 2 Due
